We Make Homes Healthy™ ThrasherPestControl.com

Preparation for Termite Fumigation

In addition to the work performed by the fumigator that we assign to your account, it is your responsibility to help prepare your home for the fumigation. Taking the following steps prior to fumigation helps ensure its success, resulting in the elimination of drywood termites from your home.

Your assigned fumigator will supply additional home preparation instructions AND documents for your signature

- Sign and Return All Documents well in advance of your fumigation date
- We provide 20 special Nylofume bags. Please pick them up or arrange for them to be mailed to you prior to the fumigation.

The Day Before Fumigation

- Water the soil up to 18 inches from the outer walls of your home to protect outdoor plants and shrubs.
- Cut back foliage, shrubbery and landscaping at least 18 inches from the structure to allow room for the tarps.
- Remember to make arrangements for overnight accommodations for you and your pets, as the fumigation will typically take two days.
- Please keep in mind that fumigations cannot be performed in strong winds and will be rescheduled if there is inclement weather.

The Day of Fumigation

- We need your keys! Contact us to arrange for your keys. If security during the fumigation is a concern, contact our office for more information.
- Remove all plants from your home, including those on outdoor patios.
- Evacuate all people and pets from the structure.
- Remove mattresses completely enveloped in plastic, such as baby mattresses with waterproof covers, or remove or open the covers.
- Remove or double-bag anything that will be ingested: food, drugs (including tobacco products), medicinals, spices, etc. in the special Nylofume bags provided. You do not need to bag or remove items in plastic, glass, or metal bottles, cans or jars with the original manufacturer's seal intact (refer to the flyer, *What Needs to be Bagged*).
- Seal the Nylofume bags by following the special instructions provided with the bags.
- Double-bag (in Nylofume) cold and frozen foods and leave them in the refrigerator and freezer. Remove shelves from the refrigerator and freezer to make it easier to stack the bags inside.

After the Fumigation

- It is unnecessary to wash dishes, linens, clothing, etc., as Vikane is a gas and will dissipate from the structure.
- Retain the "Clear to Enter" notice that was posted on your house. The utility company representative will request to see it.
- Call the utility company to schedule a gas "re-light" visit.
